Summary

Full Stack Developer (fresher) building production-style applications across the stack. Designed and shipped a backend-focused REST API (CommerceCore-API) with MySQL transactions, JWT authentication, and Redis caching, and a React.js application with a Node.js/Express/MongoDB backend end to end. Comfortable owning a feature from database schema to deployed UI. Strong in React.js, TypeScript, and Redux Toolkit; currently extending backend depth with MySQL and automated testing (Jest). Seeking a Full Stack, Backend, or Frontend Developer role.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, Redux Toolkit, React Router, HTML5, CSS3, Bootstrap 5, React-Bootstrap
Backend & APIs: Node.js, Express.js, REST API Design & Integration, JWT Authentication
Databases: MongoDB (CRUD, Schema Design), MySQL (Relational Schema, Transactions), Redis (Caching)
DevOps & Tools: Git, GitHub, Docker, Vite, Vercel, Netlify, Render
Core CS: Data Structures & Algorithms, Problem Solving
Currently Learning: Jest, React Testing Library

Projects

CommerceCore-API | *Node.js, Express.js, MySQL, MongoDB, Redis, JWT, Docker*

- Designed a layered REST API for a mini e-commerce system using MySQL for relational data (users, orders, payments) and MongoDB for a flexible product catalog.
- Implemented order placement inside MySQL transactions with stock validation and automatic rollback on failure, plus idempotency-key handling to prevent duplicate orders on retry.
- Built JWT authentication with short-lived access tokens and rotating refresh tokens, and role-based access control for customer/admin routes.
- Added Redis caching on product listing endpoints with pattern-based invalidation, and containerized the full stack (MySQL, MongoDB, Redis, app) with Docker Compose for one-command local setup.
- **GitHub:** github.com/chandan-sharma07/CommerceCore-API

Face Detection Music System | *React.js, Node.js, Express.js, MongoDB, JWT, REST APIs, Framer Motion*

- Built a full-stack web app that detects a user's facial expression and recommends matching music tracks.
- Developed Node.js/Express REST API endpoints that process facial-expression data and return matched tracks, with MongoDB for data storage.
- Implemented JWT-based login and signup, including token issuance and session validation for personalized access.
- Built the React.js client with 15+ reusable components and Framer Motion animations, consuming the APIs in real time.
- **Live:** mood-melodies-pi.vercel.app *Frontend on Vercel, Backend on Render*

Education

Prestige Institute of Management & Research Completed 2026
B.Tech in Computer Science Engineering *Bhopal, Madhya Pradesh*

- University: RGPV
- CGPA: 7.42

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle (2025)
- TCS iON Career Edge, Young Professional – Tata Consultancy Services (2025)
- Cisco Cybersecurity Essentials – Cisco Networking Academy

Extracurricular Activities

- **NSS Volunteer (2024–2026):** Coordinated community outreach programs for 100+ participants, building leadership, teamwork and public-communication skills.
